D. Scott Cyphers

D. Scott Cyphers received an S.B. in Computer Science and Engineering at the Massachusetts Institute of Technology in 1982, and an S.M. in Electrical Engineering and Computer Science in 1985. In 1986 he went to Symbolics and from there to Object Design (now Progress Software) in 1991. Scott returned to MIT in 1999 where he is a research scientist.

Scott has had experience in speech recognition, mathematics, software development, software tool development, debugging, operating systems, object-oriented language implementation, and the organization of reliable and maintainable software systems.

Scott is using his software development experiences to improve the reliability and ease of development and use of the current systems. At the same time, he is investigating future architectural changes that will support rapid development of more sophisticated dialogues, agents, mobile devices, and integration with other Oxygen systems.
